<u>Tech Tip -Foto Flexer</u>

Today I'm going to show an easy way to get photoshop effects on a similar website called <u>www.fotoflexer.com.</u>

This is useful if you don't have photoshop on your computer at home, or a computer you're using - and it's free with no download. If you can't find any effects you like on foto flexer, there is also another common website called <u>www.picmonkey.com</u>

There are many things you can do on this website such as filters, collages, text, borders, airbrush effects, red eye effects, teeth whitening, cropping, wrinkle removing and more. It has all the common effects photoshop offers, but it's easier to use.

Type <u>www.fotoflexer.com</u> into your search bar.
It should look like this:

When you get to the website it may or may not ask you to sign up, or at least give your email.

There are some effects that are premium which means you can get them with a monthly charge, but there are still many useful ones that are free and easy. Chose and upload a photo, then pick the effects you'd like to use and edit and decorate your photo.

The one I'm going to show, I used the <u>colour splash effect</u> on, which means it's black and white with a splash of colour (like we have already done in class), but this way is much easier. I then chose an effect from the effects tool bar called <u>"Cross Process"</u>. I then added text to the photo with the babies name to make it more unique, and added a heart symbol which I found under the decorate, <u>"Stickers"</u> tool bar. You can edit the size, font, and colour with your choice.
